

NumPy Quick Cheat Sheet

=====

1. Array Creation

`np.array([1, 2, 3])`

- Create array from list

`np.zeros((2, 3))`

- Array of zeros

`np.ones((3, 3))`

- Array of ones

`np.eye(3)`

- Identity matrix

2. Array Attributes

`arr.shape`

- Shape of the array

`arr.ndim`

- Number of dimensions

`arr.dtype`

- Data type of elements
